

Bellwork – Copy Down Agenda for the Week

- * Monday – Labor Day
- * Tuesday – CW – LDC Collaboration and Conflict
HW – World Map
- * Wednesday – CW - LDC Command – Hammurabi’s Code
HW – World Map Due
- * Thursday – CW – LDC Command – Hammurabi’s Code
HW – Women in Mesopotamia Blog
- * Friday – CW – LDC Common Good
HW – Women in Mesopotamia Blog

Title Page 18 – Collaboration and Conflict

* Split your Paper into 4 Boxes as you see below

Problem A

Problem B

Problem C

Problem D

LDC Collaboration and Conflict

1. You will get 4 Problems (A,B,C,D)
2. Read your problem and follow all directions on the slide.
3. Problem A and C you will need to choose the best solution to the problem and explain why it is best.
4. Problem B and D you will need to draw your solution to the problem
5. Irrigation – Means a system to move water
(Ex. - Sprinklers)

View the problem and choose which solution is best with your shoulder partner. Explain in 3 sentences why you chose your answer.

Zagros Mountains

Problem A: You are a Mesopotamian living in one of the villages in the foothills. You must decide what to do about the food shortages in your village. Which of the following responses do you think will best address the problem?

- A. Increase the number of times each year that farmers plant their crops.
- B. Move down to the river plains and try to grow crops there.
- C. Abandon farming and return to hunting and gathering.
- D. Attack neighboring villages and steal their food.

View the problem then draw and label the best plan to provide your community with a years supply of water.

Euphrates River

Problem B: You live in one of the villages on the Mesopotamian plains. To provide your village with a year-round supply of water, you must design a water-control system. Draw and label the best plan for this system. Your plan should include rivers and fields.

View the problem and choose which solution is best with your shoulder partner. Explain in 3 sentences why you chose your answer.

Irrigation Canal near the Euphrates River

Problem C: You live in one of the villages on the Mesopotamian plains. You must decide on the best way to maintain a complex irrigation system. Which of the following responses do you think will best address this problem?

- A. Maintain only the canals around your village's fields.
- B. Force members of another village to maintain the entire irrigation system throughout the year.
- C. Cooperate with other villages to regularly maintain the entire irrigation system.
- D. Abandon irrigation and return to collecting and carrying water from the river to the fields.

View the problem then draw and label the best plan to provide your community with a safe place to live

An Attacking Army

Problem D: You live in a Sumerian city. Neighboring communities are planning attacks on your city. You must design and draw a defense plan to protect the city. Make a simple drawing of the city, and design your plan around it.

LDC Collaboration and Conflict

- In your 4 problems you had to make choices between whether or not you were going to collaborate or get into a conflict
- For each problem circle on your iPad whether you chose Collaboration or Conflict

Problem A – Collaboration or Conflict

Problem B – Collaboration or Conflict

Problem C – Collaboration or Conflict

Problem D – Collaboration or Conflict

Exit Assignment

- * On Ferrellworldhistory.weebly.com go to the tab labeled Submit Assignments under World History.
 - * Find your correct period and answer these questions using R and A of RARE.
 - * 1-2 Sentences for each questions
1. How did working together help the people of Mesopotamia survive?
 2. Even if you are working together why does conflict still exist?
 3. Will there be times when there has to be conflict? Give an example.
